

5.8 GHz, 802.11a Amplifier <u>Coax Series</u> Item 58101 Rev B

Shireen's new generation of 5.8GHz Coax amplifiers are designed for OFMD radios and offer very linear performance. With peak output power of 2Watt (33dBm) these can be used as 500mW~1W amps for 802.11a equipment. These are the smallest bi-directional amplifiers in 5~6GHz with 2 watt peak power in the market today.

- Smallest housing that does not require mounting
- Unique heat dissipation mechanism
- Field diagnostics and serviceability without tools
- Male/female gender for easy insertion
- Complete kit includes amplifier, DC injectors & power supply
