## WIRELESS TEMPERATURE SENSOR

### ACCESSORIES

2.7" w x 4.6" h x .1" d

#### MODEL ACC0414RF

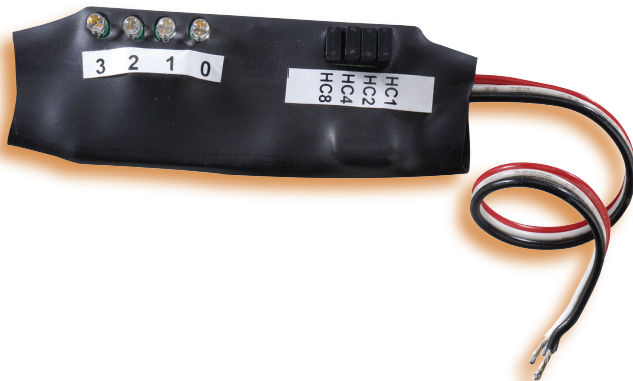

The Wireless Remote Sensor can be used to monitor indoor or outdoor temperature. It has an override button for commercial thermostat flexibility during after-hour usage. The sensor location is not restricted by wiring constraints.

- 4 selectable transmission rates
- Long battery life
- Compatible with the T1100FS, T1700, T1800, T1900, T2300FS, T2700, T2800, T2900, T2900SCH and TSTATEZ thermostats.

For a complete list, contact VENSTAR.

#### MODELS:

**ACC0414RF & ACC0414REC**

#### MODEL ACC0414REC

The ACC0414REC receives the temperature signal from the Wireless Temperature Sensor.

The receiver will automatically average the temperature it receives from any wireless sensors on the same house code and report the average to the thermostat.

Up to 8 Wireless Sensors (ACC0414RF) may be used with 1 Receiver (ACC0414REC).

- Diagnostic LEDs
- 16 house codes
- Compatible with the T1100FS, T1700, T1800, T1900, T2300FS, T2700, T2800, T2900, T2900SCH and TSTATEZ thermostats.
