

Compact and concealable room temperature measurement

The new Daikin Button Sensor Kit provides indoor temperature measurement with a compact and concealable design. It replaces the return air thermistor in the indoor unit and extends the sensing location to up to 40 feet away from the indoor unit. The surface of the button sensor is paintable to match wall color and to conceal from view.

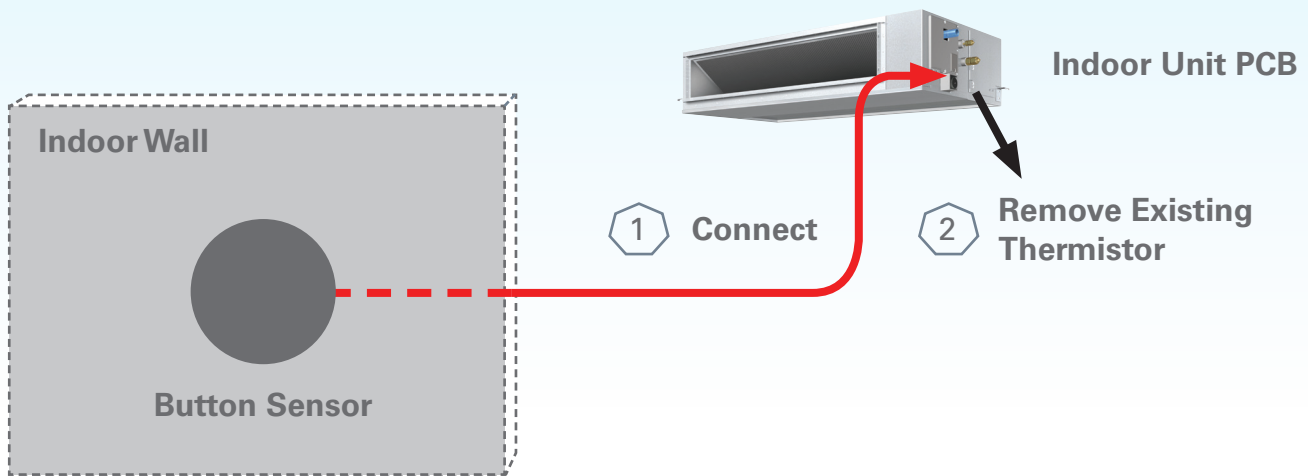

Features

- » Extends the sensing location by replacing the return air thermistor in the indoor unit
- » Compact and concealable design
- » Paintable surface to match wall color*
- » Sensor, plenum rated cable, and wiring harness adaptors are included in the kit

Items	Button Sensor	4-Pin 40 ft. Plenum Rated Cable	2-Pin 4 in. Harness Adaptor	3-Pin 4 in. Harness Adaptor
Quantity	1	1	1	1
