

Smart Thermostat Wireless

RDS110.R

To control heating applications in apartments, single family homes, dormitories, and other residential as well as commercial spaces.

- Backlit, 90 mm color LCD touch screen for intuitive local operation
- Mobile app for smart phones
- Patented¹⁾ self-learning algorithm with PID response
- Green leaf for energy-optimized operation
- Operates automatically following a schedule
- Presence detection via geo-fencing
- Multifunctional inputs for remote sensors
- Communicates with in-house devices via Thread
- Integration into any BACnet system
- Satisfies Class IV according to the Eco design directive

1) Patent pending

Room thermostat features

- Direct temperature and operating mode selection
- RoomOptiControl¹⁾ function with Green leaf indication for energy-optimized operation
- Temperature setting limitation for use in public spaces
- Air quality indication: **Good** 🌿, **Okay** 🌻, **Poor** 🌺
- Screen lock protection against unauthorized access
- Manual switchover between **At home**, **Away** and **Off** on touch screen
- Room temperature detection and control using the built-in temperature sensor or an optional remote sensor
- Optional temperature averaging using an additional remote temperature sensor
- Patented self-learning algorithm with PID response (patent pending) guaranteeing optimum temperature control performance in all room types
- Optimum start control function that advances the switch-on time to ensure the selected setpoint is reached as required
- Floor temperature limitation using a remote, wired sensor in electric floor-heating applications
- Humidity control using the built-in humidity sensor or an optional remote sensor
- Two multifunctional inputs, optional and configurable for remote sensors (see section Use [→ 2] for more information)
- Periodic pump/valve operation to protect against seizing
- Navigation wizard for guided, fast commissioning
- Wireless communication with receiver RCR114.1 and radiator valve SSA911.01TH via Thread
- Local modification of BACnet settings (see the User Guide for more information)
- Remote firmware upgrade capability

1) Automatically detect unnecessary energy consumption in the room and display it via Green Leaf on the thermostat. When the leaf is red, the thermostat setting has been changed. Touch the red leaf to return the setting to energy-optimized operation. See the user guide for more information on this function.

Remote operation and monitoring

- Mobile app for smartphones based on iOS and Android operating systems
- Support **Dark** and **Light** background colors on mobile app
- Manual switchover between **At home**, **Away** and **Off** operating modes on mobile app
- Presence detection via geo-fencing for energy-efficient operation
- Individual schedule for each day of the week can be programmed via mobile app with the following operating modes (max. 8 modes per day)
 - **Comfort**: To enjoy comfort and coziness when you are at home.
 - **Economy**: To save energy when maximum comfort is not required, e.g. in the evening or at night.
 - **Unoccupied**: To save energy costs by reducing the temperature setpoint, e.g. when the room is unoccupied.
- Individual schedule for domestic hot water boiler
- User account management
- Monitoring of actual and historical temperature and humidity values
- Secure access and data transmission with the Siemens Cloud Computing Platform

Use

The RDS110.R is designed to control heating applications in apartments, single family homes, dormitories, and other residential as well as commercial spaces.

RDS110.R controls the following plant components with its peripherals:

RDS110.R with radiator valve actuator (SSA911.01TH):

- Radiator with valve (SSA911.01TH)

Note: The RDS110.R can control max. 6 valve actuators in parallel, i.e. with the same control settings.

RDS110.R with wireless receiver (RCR114.1):

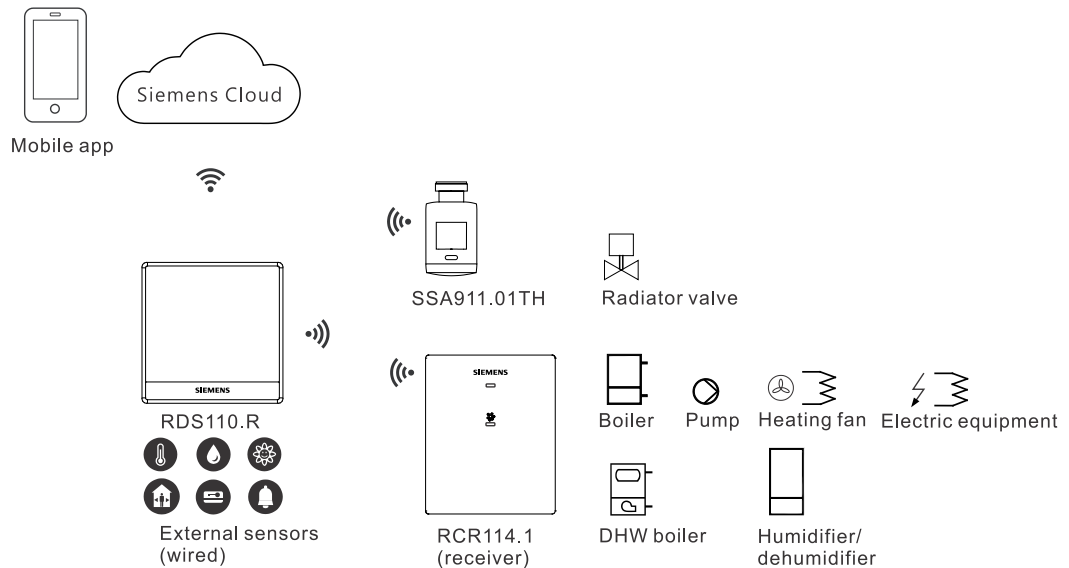

- Gas boiler
- Radiator with pump
- Electric floor heating
- Fan with electric heating
- Floor heating with valve
- Floor heating with pump
- Electric radiator
- Electric boiler
- Generic heating device

	NOTICE
	When selecting the gas boiler application, ensure a hydronic heating is used. The RDS110.R is not calibrated for use in combination with a gas-fired ducted heating system.

The RDS110.R can control max. 6 receivers in parallel, i.e. with the same control settings. The RCR114.1 has two relay outputs, one of which is for heating equipment (listed above). The other relay is available to optionally control a domestic hot water (DHW) boiler, humidifier or dehumidifier.

The RDS110.R has two multifunctional inputs, optional and configurable for:

- Operating mode switchover contact
 - The operating mode can change according to contact status.
- Remote room temperature sensor
 - The remote temperature sensor can acquire the current room temperature. If the sensor input signal is lost, the thermostat controls the room according to the internal sensor.
- Floor temperature sensor
 - The floor heating limitation function prevents the floor temperature from exceeding a preset value.
- Outside air temperature sensor
 - The outside air temperature sensor can acquire outside air temperature information for display on touch screen.
- Remote humidity sensor
 - The thermostat can control a standalone humidifier or dehumidifier. The relative humidity is measured by the remote humidity sensor or internal humidity sensor.
- VOC and CO₂ sensors
- Condensation monitor
- Universal contact

Notes:

1. Install the receiver close to RDS110.R if possible. The communication range in a building is typically 60 m, without any blockades. Please note the range can vary, as walls, floors, wireless interference and other factors may reduce the signal strength.
2. Add a repeater (RCR114.1) if the connection fails due to low signal strength (distance or blockades (walls, etc.)).
3. The thermostat can only connect to one heating system – so it cannot simultaneously control the wireless relay and the valve actuator.
4. The thermostat can control up to six wireless relays or valve actuators.

Mechanical design

The room thermostat consists of the following parts:

- Housing front with touch screen
- Housing rear with terminals and temperature sensor
- Metallic mounting plate for wall mounting
- Accessories

Normal display

1	Tap to display detailed information and additional settings.
2	Tap to display additional measurements, for example, outside air temperature. (Only if external sensor is connected)
3	Tap to display notifications (only visible if any)
4	Room temperature
5	Tap to toggle between At home and AWAY .
6	Displays whether the thermostat is following a schedule (AUTO) or following your setpoint changes permanently (↔). Following a schedule can mean the following: <ul style="list-style-type: none"> • If there is a network connection and you've also set your schedule, the thermostat follows your schedule. Your temporary change of the temperature setpoint only takes effect during the currently scheduled mode. • If the network is connected but no schedule set, the thermostat applies the system's default schedule. • Without network connection or valid time, the thermostat cannot retrieve schedule information from the Cloud. It always works in the Comfort mode.
7	Tap or slide to change the room temperature setpoint. * <ul style="list-style-type: none"> 🔴 The thermostat is in heating mode – at some point, the relay will be energized, depending on the heating demand and application type. 🟡 The thermostat is not in heating mode.

NOTICE! * There is a few seconds' delay between the color change in the temperature bar and the reaction of the relays.

NOTICE

After initial setup of the thermostat, the displayed room temperature may not be correct because the temperature sensors need time for calibration. Wait for at least one hour for the calibration.

Idle display

The RDS110.R screen switches to **idle** mode after 2 minutes of inactivity. The **idle** screen of the RDS110.R can be displayed as a simple screen with basic room values, or as a blank, black screen. The simple screen is the default setting.

1	Relative room humidity
2	Room air quality status: good  , average  , poor  . (Displayed only if an external air quality sensor is connected to the thermostat)
3	Outside air temperature (displayed only if an external temperature sensor is connected to the thermostat)
4	Green leaf: Energy-optimized mode. Red leaf: Tap to restore the energy-optimized mode.
5	Room temperature

NOTE: The icons displayed in **idle** mode may differ if you've connected external sensors to your thermostat. For example, the idle screen may display room air quality status or outside air temperature if a related external sensor is connected to the thermostat. However, the relative room humidity value and green leaf indication are always displayed on the idle screen.

To set idle display

1. On the Home screen, tap , then tap > until the **Settings** page displays.
2. Tap  > , and then tap  or  to set the idle screen as pure blank or with values.

Type summary

Product number	Stock number	Description
RDS110.R	S55772-T103	Smart Thermostat Wireless

Ordering

- When ordering, indicate product number, stock number and description.
- Order valve actuators separately.

Notes

Security

	⚠ CAUTION
	<p>National safety regulations</p> <p>Failure to comply with national safety regulations may result in personal injury and property damage</p> <ul style="list-style-type: none"> • Observe any national provisions and comply with the appropriate safety regulations.

Engineering

See the product documentation for information on engineering, selection and sizing connecting cables for supply voltage and field devices.

Installation

The mounting plate of the thermostat can be installed on CEE/VDE conduit boxes and on square boxes 75 x 75 mm. For installation on a rectangular conduit box (e.g. 105 x 72 mm), accessory ARG100.01 must be ordered, which includes 1 set of white decoration frame and bigger mounting plate.

⚠ WARNING

No internal line protection for supply lines to external consumers

Risk of fire and injury due to short-circuits

- Adapt the line diameters as per local regulations to the rated value of the installed overcurrent protection device.
- The AC 230 V mains supply line must have an external circuit breaker with a rated current of no more than 10 A.
- Use only AC 230 V isolated wired cables, as the conduit box carries AC 230 V mains voltage.
- Inputs X1-M-X2: Several switches (e.g. window contact) may be connected in parallel. Consider overall maximum contact sensing current for switch rating.
- Disconnect from power supply before removing the front of the thermostat.

Commissioning

Refer to the Quick guide and User guide (see Product Documentation) to configure your device. Commissioning includes the following:

- Internet connection
- Application setup
- Account registration and device pairing

Note:

Before configuring your thermostat, make sure you are connected to the Internet, have a valid email address, and a smartphone.

Mounting

- The devices are suitable for wall mounting.
- Recommended height: 1.50 m above the floor.
- Do not mount the devices in recesses, shelves, behind curtains or doors, or above or near heat sources.
- Avoid direct solar radiation.
- Seal the conduit box or the installation tube if any, as air currents can affect sensor readings.
- Adhere to allowed ambient conditions.

Operation

End users can operate the thermostat directly on the touch screen, or download the mobile app **Siemens Smart Thermostat RDS** and perform operations on their smartphones, including:

- Creating and managing accounts
- Setting the operating mode (Auto, away, home, manual)
- Changing the room temperature (by setting new setpoints)
- Setting a weekly schedule (heating and domestic hot water)
- Opting for geo-fencing
- Selecting the Green leaf (switching to energy-optimized operation)
- Viewing temperature, humidity and heat demand trends

Supported smartphone types are as follows:

Operating system

OS	OS version	App store
iOS	iOS 10 or above	App store®
Android	Android™ 5.0 or above	Google Play™

Maintenance

The thermostat is designed for maintenance-free operation.

Disposal

The device is considered an electronic device for disposal in accordance with the European Guidelines and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Warranty

Technical data on specific applications are valid only together with Siemens products listed under **Equipment combinations**. Siemens rejects any and all warranties in the event that third-party products are used.

Radio equipment directive

The equipment is using harmonized frequency in Europe, and complies with the Radio Equipment Directive (2014/53/EU, formerly 1999/5/EC).

Power supply

Power supply	
Operating voltage	AC 230 V (+10% / -15%)
Frequency	48...63 Hz
Power consumption	Max. 9 VA
Standby power consumption (LCD off)	1.6 W
Max. external supply line fusing	10 A circuit breaker

Radio parameters

Radio parameters	
Frequency band	2.4...2.4835 GHz
Maximum radio-frequency power	18 dBm
WLAN standard	IEEE 802.11b/g/n (HT20)
WLAN channel	1~13

Frequency band	2.4...2.4835 GHz
Maximum radio-frequency power	15 dBm
Thread standard	IEEE 802.15.4
Thread channel	11-26

Inputs

Connections to multifunctional inputs X1 - M - X2	
Passive temperature sensors - Cable length max. (copper cable section) - NTC type Room temperature range Outdoor temperature range Floor temperature range* - Ni type Room temperature range Outdoor temperature range Floor temperature range* - Pt type Room temperature range Outdoor temperature range Floor temperature range*	90 m (1.5 mm ² wire), 70 m (1 mm ² wire) 60 m (0.75 mm ² wire), 40 m (0.5 mm ² wire) NTC10K at 25 °C 0...50 °C -50...80 °C -50...80 °C Ni1000 at 0 °C 0...50 °C -50...80 °C -50...80 °C Pt1000_375/Pt1000_385 at 0 °C 0...50 °C -50...80 °C -50...80 °C

Digital contacts - Operating action - Contact sensing - Parallel connection - Input function	Selectable NO/NC DC 14...40 V, 8 mA (typ.) Max. 20 thermostats per switch Selectable

* Available when electric heating is energized.

Operational data

Setpoint setting range		
0...50 °C		
12...35 °C (default)		

Built-in room temperature sensor		
Temperature range	Accuracy at 25 °C	Display resolution
0...50 °C	±0.5 K	0.5 K

Built-in room humidity sensor		
Humidity range	Accuracy at 25 °C	Display resolution
0%...100%	±5% r.h.	1%

Connections

Interfaces	
Micro USB	A service port is limited to firmware upgrades and onsite diagnosis by professionals.

Wiring connections	
Screw terminal	Solid wires or prepared stranded wires: Max. 1 × 0.5... 2.5 mm ² (14...20 AWG)

Conformity

Ambient conditions and protection classification	
Safety class as per EN60730	Class II
Degree of protection of housing as per EN 60529	IP30
Classification as per EN 60730	
Function of automatic control devices Operation altitude Degree of contamination Overvoltage category	Type 1 < 3000 m 2 III
Climatic ambient conditions	
Transport (packaged for transport) as per EN 60721-3-2 Storage as per EN 60721-3-1 Operation as per EN 60721-3-3	Transport/ Storage: Temperature -25...60 °C (-13... 158 °F) Air humidity 5...95% r.h. (non-condensing) Operation: Temperature 0...50 °C (23... 122 °F) Air humidity 5...95% r.h. (non-condensing)
Mechanical ambient conditions	
Transport as per EN 60721-3-2 Operation as per EN 60721-3-3	Class 2M2 Class 3M2

Standards, directives and approvals	
EU conformity (CE)	A6V11802452 ^{*)}
RCM conformity	A6V11231674 ^{*)}
Environmental compatibility	The product environmental declaration A6V11806767 ^{*)} contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal).

^{*)} The documents can be downloaded from <http://siemens.com/bt/download>.

Eco design and labeling directives

ErP class 4	Based on EU Regulation 813/2013 (Eco design directive) and 811/2013 (Labelling directive) concerning space heaters, combination heaters, the following classes apply:		
	Application with On/Off operation of a heater	Class I	Value 1%
	PWM (TPI) room thermostat, for use with On/Off output heaters	Class IV	Value 2%

General data

General		
Dimension	Refer to Dimensions on page 18	
Weight	Thermostat with package, user document and accessory	534 g
	Thermostat	219 g
Color	Silver plating Housing: Pantone black
