

Item # TRA4503P, Phantom Antennas

Phantom Antennas

Stock Locator

- U.S. Patent nos. 45,977,931 and 6,292,156 - do not be fooled by imitators that have no gain or no field diversity
- Phantom true field diversity design ensures uninterrupted video and data transmissions in urban canyons and rural drop off areas
- 3 dB-MEG gain outperforms a 3 dB whip in many applications
- For mobile and fixed applications with NMO or permanent N female mount
