

# Control made *easy*

## INTRODUCING LG SMART AC!

Just left for vacation and forgot to change the settings on your air conditioner? Feeling panicky? Worried about high energy costs? Well, no need to worry. Now you can control your LG Duct-Free Split air conditioner from just about anywhere, using your *smart phone*.

### WHAT IT DOES

Hardware WLAN module (Item# PCRCUDT3) and smart phone app together provide monitoring and remote control capabilities with select\* LG Duct-Free Split air conditioners such as:

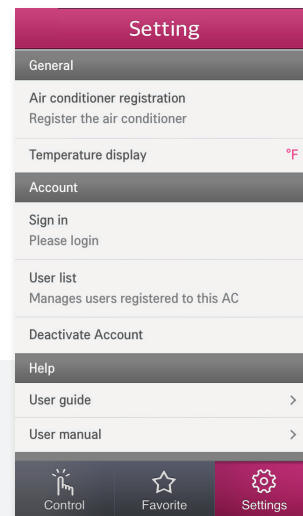

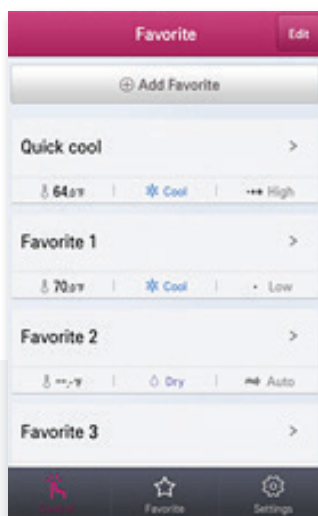

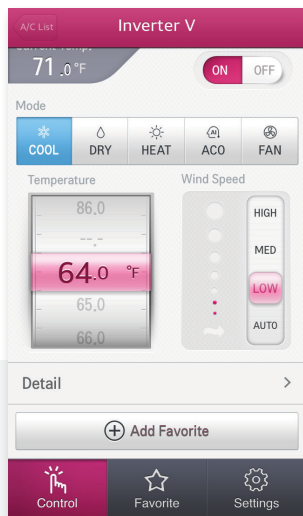

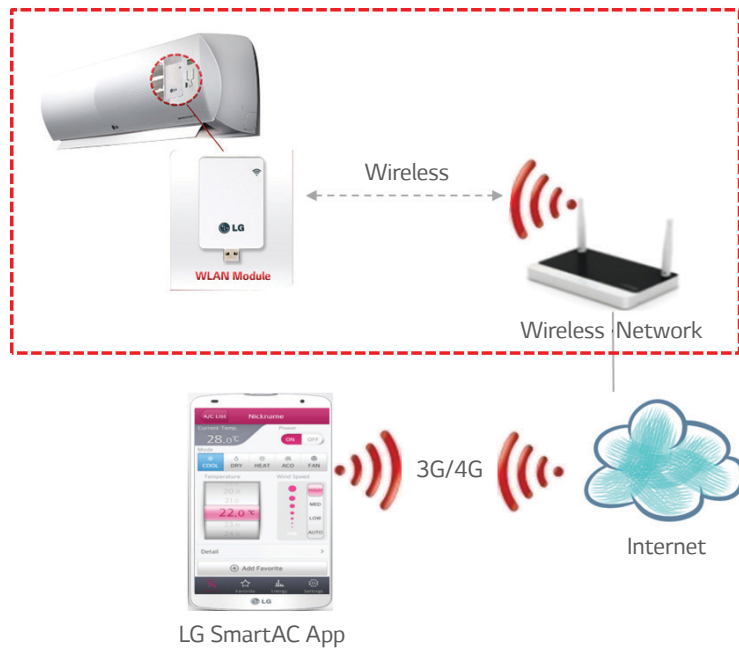

- Control – Use to make instant changes to temperature and fan speeds
- Favorite Settings – Create or save an existing setting as a favorite
- Advanced Functions – Control additional features such as purification, air flow, sleep timer, filter renewal date
- Additional Settings – Register a/c unit, set temperature unit display (°F or °C), help, etc.

WLAN Module PCRCUDT3

# HOME SETUP

## LG SmartAC Remote Home System Control

TO DOWNLOAD *FREE* APP

With LG, it's all possible.™
