¹ For a list of supported modems, please refer to: <http://www.peplink.com/modem>
² Recommendation for sizing purposes only. No software restrictions applied.
³ Router and SpeedFusion Throughput is based on Ethernet frame sizes of 1280 or 1518 bytes. Actual performance can vary across different networking environments. Figures apply to the latest hardware revision.
⁴ Number of peer Peplink or Pepwave devices you can connect using SpeedFusion.
⁵ The Balance 20 and 210 has 2 WAN ports activated by default. The third WAN port can be activated by an optional license key.
⁶ If the WAN Activation License (BPL-ONE-LC-5WAN) is activated, router throughput will be changed to 400Mbps, both number of WAN and LAN will become 5.
⁷ Available in BPL-ONE.
⁸ Balance 305 supports 2 SpeedFusion peers. It supports up to 30 SpeedFusion peers with purchase of SpeedFusion License (BPL-305-SPF).

⁹ Balance 20/30 LTE/One/210/310 comes with AP Controller Standard, which supports up to two configuration profiles with multiple SSIDs, meaning that all APs will share the same configuration, and you can only manage APs on the local physical LAN. Balance 305/380/580/710/1350/2500 comes with AP Controller Pro, which supports multiple configuration profiles with multiple SSIDs, and you can manage remote APs outside the local physical LAN.
¹⁰ Balance 2500 is available in two configurations with different LAN interfaces.
¹¹ SFP+ fiber module (transceiver) is not included.
¹² 2 PepVPN Peers are enabled by default. Can be increased to 5 Peers using license PVN-LC-05.
¹³ 2 PepVPN Peers are enabled by default. Can be increased to 5 Peers using license PVN-LC-05 or to 20 Peers using license MAX-HD-020-SPF.
¹⁴ 30/50 SpeedFusion Peers are enabled by default for Balance 380/580 respectively. Can be increased to 100 Peers with purchase of SpeedFusion Bonding license SFN-LC-100.
¹⁵ Available as a license add-on.

Ordering Information

Product Code	Model	Description
BPL-021	Balance 20	2x GE WAN ports and 4x GE LAN ports.
BPL-031-LTE-US-T	Balance 30 LTE for Verizon/Sprint/AT&T/T-Mobile	2x GE WAN ports and 4x GE LAN ports. 4G LTE-A: B1, B2, B3, B4, B5, B7, B8, B12, B13, B20, B25, B26, B29, B30, B41
BPL-031-LTE-E-T	Balance 30 LTE for Europe/International	2x GE WAN ports and 4x GE LAN ports. 4G LTE: B1, B3, B5, B7, B8, B20, B38 (TDD), B40(TDD), B41 (TDD)
BPL-031-LTEA-W-T	Balance 30 LTEA for Worldwide	2x GE WAN ports and 4x GE LAN ports. 4G LTE-A: B1, B2, B3, B4, B5, B7, B8, B12, B13, B20, B25, B26, B29, B30, B41
BPL-031-LTEA-P-T	Balance 30 LTE for Asia Pacific	2x GE WAN ports and 4x GE LAN ports. 4G LTE-A: B1, B3, B5, B7, B8, B18, B19, B21, B28, B38, B39, B40, B41
BPL-ONE	Balance One	Advanced Dual-WAN Router. 8x GE LAN Ports. Built-in simultaneous dual-band 802.11ac Wi-Fi AP with embedded antennas.
BPL-ONE-CORE	Balance One Core	Advanced Dual-WAN Router. 8x GE LAN Ports.
BPL-210	Balance 210	2x GE WAN ports and 7x GE LAN ports. SpeedFusion capable.
BPL-305	Balance 305	3x GE WAN ports and 3x GE LAN ports. SpeedFusion available as a paid upgrade.
BPL-380	Balance 380	3x GE WAN ports and 3x GE LAN ports. SpeedFusion capable.
BPL-580	Balance 580	5x GE WAN ports and 3x GE LAN ports. SpeedFusion capable.
BPL-710	Balance 710	7x GE WAN ports and 3x GE LAN ports. SpeedFusion capable.
BPL-135	Balance 1350	13x GE WAN ports and 3x GE LAN ports. SpeedFusion capable.
BPL-2500	Balance 2500	12x GE WAN ports and 8x GE LAN ports. Supports LACP (802.3ad) NIC bonding. SpeedFusion capable.
BPL-2500-SFP	Balance 2500	12x GE WAN ports and 2x 10G SFP+ LAN ports. SpeedFusion capable.
BPL-2500-2SFP	Balance 2500	4x GE WAN ports, 2x 10G SFP+ WAN ports, and 2x 10G SFP+ LAN ports. SpeedFusion capable.

Peplink Balance SD-WAN Router

Unbreakable Internet. VPN Connectivity. Bandwidth Bonding.

Peplink Balance SD-WAN Router

The Peplink Balance SD-WAN router lets you take control of your WAN and achieve unbreakable Internet connectivity. Centralized cloud management simplifies network setup, configuration, and maintenance.

Greater Speeds, Absolute Reliability, up to 90% Cost Reduction

Using SpeedFusion™ bandwidth bonding technology, you can combine multiple DSL, cable, 4G LTE, and 3G links – up to 13 of them into a single high-speed SD-WAN connection. This enables you to access headquarters at greater speeds than you could achieve with a single link.

With each link you add, the SD-WAN connection increases its reliability. Use multiple connection technologies from diverse ISPs to provide connectivity resilience at a fraction of what it would cost using traditional WAN alone.

Intelligent VPN Traffic Routing

Guarantee the session integrity of sensitive applications such as point-of-sale or credit card transactions using Hot failover. Stream HD videos and have smooth videoconferences using SpeedFusion VPN technology. Use your commodity links to offload for your bulk traffic to the public Internet, while saving your critical traffic for private links.

Simple, Powerful Cloud Management

Using InControl, our powerful SD-WAN controller, you can easily perform a multitude of tasks from a browser. Set up a star, mesh, or point-to-point VPN with just a couple of clicks. Configure groups of devices at once to save time. Schedule automatic firmware updates for your devices.

Flexibility and Routing Intelligence Through WAN Virtualization.

Greater Flexibility: Peplink routers are capable of taking multiple Internet links and turning them into a single connection. To increase speed or reliability, simply add more links.

Application-Awareness: Set-up your traffic priorities, including VoIP and custom application traffic, with a few clicks. Once

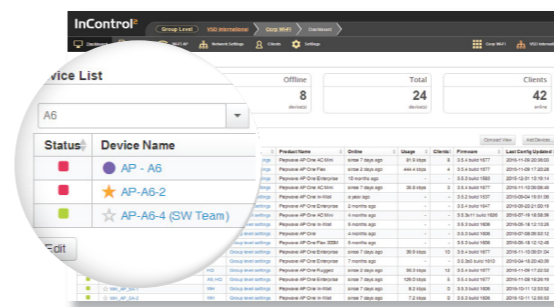

configured, all traffic is managed automatically by the software defined rules set on the device – no human interaction is required.

Automatic Failover: Peplink Routers keep your network up and running by continually checking the health of all connected links and routing traffic around inactive or intermittent connections.

InControl SD-WAN Controller For Simplified Network Management.

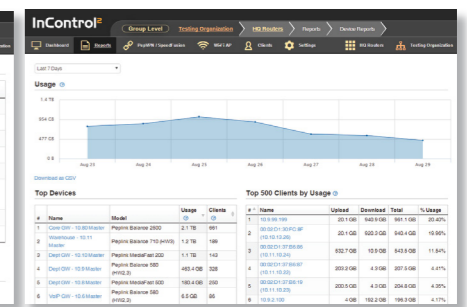

Dashboard View:

Group Firmware Policy:

Product name	Model name	Firmware
Peplink Balance 2000	6.1.0 build 1085	Release note
Peplink Balance 380 (HW3-S)	6.3.2 build 3525	Release note
Peplink Balance 580 (HW1)	6.2.2 build 3362	Release note
Peplink Balance 580 (HW2-S)	6.3.0 build 1601	Release note
Peplink Balance 710 (HW1,2)	6.3.0 build 1601	Release note
Peplink Balance 710 (HW3)	6.3.0 build 1601	Release note

Group Bandwidth Usage Report:

Comprehensive Reporting

Using InControl, branch offices can be monitored and managed centrally, giving network administrators full control over their networks using a single interface. Monitor your network's bandwidth consumption, connection status, connected clients and more in an easy to use bird-eye view.

Easy Management

Remotely access the Web Admin of any router in your network, and make configuration changes without going onsite. Push a configuration profile to multiple devices, and set-up groupwide firmware updates to save time.

Higher Reliability, Lower Costs MPLS Replacement Success Stories.

Town Of Tonawanda, New York

The Town of Tonawanda, New York needed dependable and secure VPN for its VoIP system. They initially looked into MPLS options, but the costs were staggering. Instead, they installed Peplink routers in 9 critical locations, with a municipal police station acting as HQ.

"To date, my devices have been up and running continuously with no intervention for 114 days with zero issues."

- Andrew W. Pudlak, IT Manager

Full story: www.peplink.com/tonawanda

Harrington Industrial Plastics

Harrington, the US's largest distributor of industrial plastic piping, required peak performance at its 43 busy branches. Using Peplink routers, Harrington was able to seamlessly replace their MPLS network by bonding cost-effective Cable, Fiber, and DSL connections. They couldn't be happier:

"We are saving 100K annually as compared to dedicated T1 and MPLS costs. Not to mention we are now getting 4 times the bandwidth!"

- Charles Miller, Systems Engineering

All-in-One AP Controller Solution. Cost-Effective Branch Office AP Management. Built-in Captive Portal.

Built Into All Balance Routers

AP Controller software comes standard with every Peplink router, making it a cost-effective AP management solution for small to medium locations.

Easier Management

Control and monitor your Peplink AP using a centralized admin interface. Just connect a Peplink AP to the network and it will be discovered by the Balance automatically. Manage all network connections, local client access, and user bandwidth policy.

Easy Wi-Fi Portal

Peplink's AP Controller solution features a built-in captive portal, which allows you to provide Wi-Fi hotspot service to your customers or Wi-Fi access to your guests in a corporate environment. From showing a splash screen for free users to accept service terms to creating a user login for your paid customers, you can easily customize your Wi-Fi portal in just a few clicks.
